REYNAERS HANDLES

Overview of handles for windows, doors, sliding, folding, and lift & slide doors

Reynaers
Aluminium

1. PURITY[®]

EXCLUSIVE AND ELEGANT DESIGN

For people who desire the ultimate design, a unique Reynaers handle series is created, called PuRity. This series combines next-generation material and mechanical properties with the superior Italian design abilities of designer Leo De Carlo. PuRity is innovative and distinctive in terms of material, design, and installation. The PuRity range is suited for all Reynaers windows, doors, sliding doors, and lift & slide doors.

MATERIAL

PuRity handles are made of a brand new material called PURA which is fully recyclable, 100% ecological, non-corrosive, and anti-allergic. The unique BIOV or “Bioecologic Ion Overlay” process finishing is based on the deposition of gaseous metal ions, applied under vacuum. This coating is 100% ecological and recyclable which makes the handles extremely resistant against wear, very suited for aggressive environments, and even an **anti-bacterial** option. The combination of the material and surface treatment makes PuRity a sustainable handle!

DESIGN

The PuRity range is fully adapted to the use and design needs of constructors. The result is a minimal, classical, and rational design that will give the Reynaers systems a unique touch.

INSTALLATION

We also provide the handles with their own unique new-generation mechanism, named Cliq-Claq. This mechanism slides over the square spindle of the doors or windows and then snaps into place. Consequently, it ensures stronger fixation and allows the handle to return to the perfect position.

2. TOUCH

TRUE ELEGANCE

Touch handles exude true elegance and fit into any type of architecture. Create an aesthetic look with this minimalist, timeless design, tailored to the needs of contemporary living, without sacrificing ease of use.

MATERIAL & FINISH

The Touch handles and cup handles are produced with carefully selected high-end materials. An **antimicrobial coating** is available on all existing colors and types of powder coating and anodization finishes and proven to significantly reduce the risk of pathogen transfer.

DESIGN

Style and quality are combined in Touch, a trendsetting range of design hardware from Reynaers Aluminium. Touch offers sleek, elegant, and slim hardware suitable for windows, doors, and sliding or folding systems. It is even suitable for use on wood interior doors to allow for a consistent design look throughout your home. The sleek design fits perfectly into modern buildings but also provides a stylish contrast in renovations.

SAFETY

The Touch Security handles and cup handles are burglar-proof. Door handles are fitted with a long shield in solid aluminum, making the cylinder almost impossible to access and even harder to break.

COLORS

AVAILABLE COLORS

Most Touch handles can be powder coated in over 450 RAL-colors in a matt, fine-textured, or metallic finish, or anodized in various tones. This way, we ensure a perfect match with the profiles of the window or door.

3. HORIZON

EXCLUSIVE AND ELEGANT DESIGN

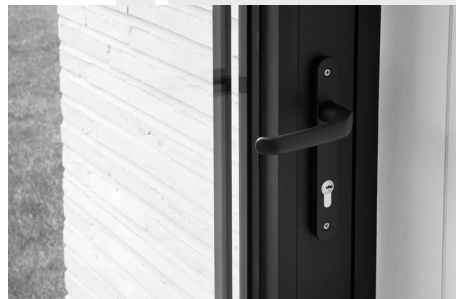

Looking for new horizons. That's the ultimate goal of nearly everyone who is building or renovating.

The Horizon handles merge, almost invisibly, into a window or door. Because of this they fit perfectly with all possible architectural styles.

MATERIAL

Horizon is built from molded or air pressed aluminum. By using pure material, the handle range has a wider variety of finishes.

An **antimicrobial coating** is available on all existing colors and types of powder coating and anodization finishes and proven to significantly reduce the risk of pathogen transfer.

PuRity

DESIGN

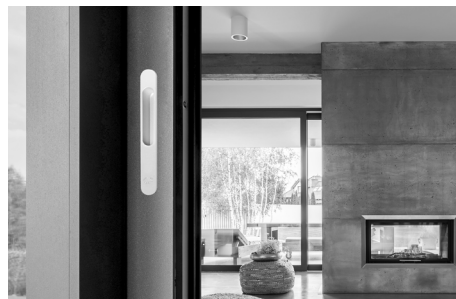

With a sleek design, Horizon handles make the perfect combination for any window or door system.

Touch

INSTALLATION

The Horizon range has been a consistent companion for Reynaers profiles throughout the years. This all-round, low entry handle range has a solution for every opening type, whether it is as simple as a window or as specific as a panic door.

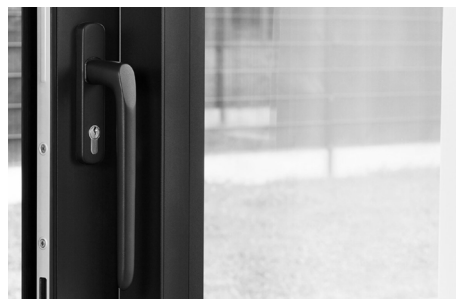

Horizon

COLORS

AVAILABLE COLORS

The Horizon handles can either be anodized or powder coated in one of our 400+ RAL-colors. This way, we ensure a perfect match with the profiles of the window or door.

4. DOOR PULLS

A GREAT FIRST IMPRESSION

A door pull is mostly used for entrance doors. It plays a crucial part in the first impression someone has of the building: the first physical connection that is made before entering.

MATERIAL AND COLOR

The door pulls are made of aluminum, excluding the DoorPull Round, which is in stainless steel.

DESIGN

We made sure that the door pulls are available in many design variations, making it easy to find the one that best fits your project's aesthetic. Short or long, thick or thin, round or square - we have them in every imaginable finish. You can even integrate complementary products like our fingerprint scanner.

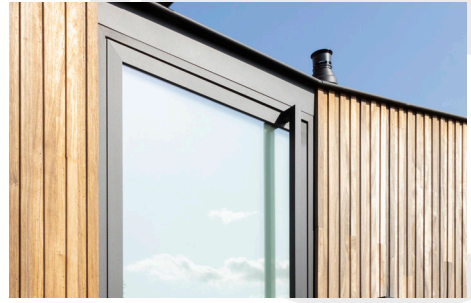

The system design makes it possible to easily adjust the full door height profiles to the required length, considerably reducing the delivery times compared to bespoke solutions.

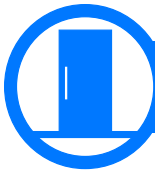

The door pull range enables Reynaers to be your one-stop-shop for entrance doors: the one place for buying all components from the system, from panels to locks and hardware.

COLORS

AVAILABLE COLORS

The door pulls can either be anodized or powder coated in one of our 400+ RAL-colors. This means our door pulls are available in every finish we have in our product range to complement your entrance doors perfectly. The DoorPull Round is only available in stainless steel

ABOUT REYNAERS ALUMINIUM

Reynaers Aluminium is a leading specialist in the development and marketing of innovative and sustainable aluminum solutions for windows, doors, curtain walls, and sliding systems. Driven by energy-efficiency and the willingness to take responsibility for the environment.

Besides a wide range of standard solutions, we also develop tailor-made solutions for all market sectors – from residential to commercial and industrial projects. Our high-quality systems all meet the most stringent demands in terms of comfort, security, architectural design, and energy-efficiency. Reynaers Aluminium is not only a supplier, but also a valuable partner— for architects, fabricators, solar installers, project developers, investors and end users.
